Bandwidth packages for the Media Hive Studio

Studio Bandwidth Option:

Option 1

As a standard, 10Mbps of Internet Speed, and uncapped data made available on a Wi-Fi router supporting 4 Physical LAN cables and basic SSID and password.

No inbound routing, bandwidth prioritization.

Cost is included in Studio rental

Option 2

All facilities of option 1 with Speed of up to 400Mbps. Times dates and spec of any requirement to be quoted on request. External IP and inbound routing as well as bandwidth and device prioritization available, project plan is required.

Cost is quoted dependent on Project plan, bandwidth required, and dates and times required.

Optional extras:

Cabling, Mesh Wi-Fi in studio, facilitation of setup of client-side network is available and is quoted based on your requirements.

The Media Hive Studio is able to cater to **custom Internet** connectivity requirements.

In example making separate bandwidth available to perform uploads at speeds of up to 400Mbps, that may be used without affecting studio connectivity.

Diverse and varying setups of all types related to Internet connectivity for Studio purposes is available.

Please contact our IT support at **010 5001442** or email **support@prosolvesa.com**

"Internet services provided by the Media Hive, are provided on an Enterprise Fiber line, however the Media hive, its agents, employees and other parties involved in the provision of the service do not guarantee suitability for any particular purpose. It is explicitly stated that we cannot guarantee a particular speed to all points on the internet, as no one has base control of all interconnects once the traffic leaves the building. Speed stated is maximum speed tested on the provided cabled connection at the point of provision. It is assumed that the client is technically skilled or has access to such skills, as may be required to understand the limitation of Wi-Fi and various connection methodologies that they will be utilising. Base wired connection with DHCP address allocations are provided at 2 points within the Studio environment, and basic Wi-Fi. No setup Physical assistance or other labour is provided for in the cost of the bandwidth element of your rental. Should such assistances be required or mandated then we will require a detailed specification of what is required, 72 hours in advance of your shoot in order to facilitate planning, required element will then be quoted and subject to customer approval."
